

DATA 534 Group Project or Quiz 2

Wrap dat API

Group: Alex Havers, Derek Reay, Bruno Santos

API: Canadian Recalls and Safety Alerts

Contribution Document

The workflow expected for this group started from the choice of the API that would be used in the project. This was done through a brainstorm and Canadian Recalls and Safety Alerts was selected. After choosing the API, the group decided what would be the best approach and what will be the role of each one from now on.

The workload decision:

- 1.) Travis CI/coverage (Derek)
- 2.) Wrap API into R Function (Contribution from all group members)
- 3.) Create the R package structure and build (Bruno)
- 4.) Code of conduct/Contributions documents (Contribution from all group members)
- 5.) Vignette (Alex)
